ENHANCE COVERAGE AND REDUNDANCY

IoT, M2M & Failover Data

Finally Done SMART

SmartSIM is a multi-carrier, single-SIM solution that seamlessly delivers the best signal strength from 3 domestic carriers and 600+ carriers globally.
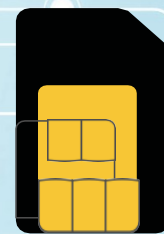

- **Competitive data plans**
- **Single bill**
- **Inherent disaster recovery**
- **Best coverage via intelligent and automatic carrier switching**

The SharpLink SmartSIM solution pairs any WAN-capable hardware that accepts a SIM card – mobile computers, tablets, cellular routers, IoT devices and more – with the best available cellular network connectivity. There's no need to choose a carrier or worry about wireless signal strength because the SIM intelligently bonds to the best coverage from AT&T, T-Mobile or Verizon in the U.S. and over 600 other providers around the globe.

SmartSIM ordering is processed via our TLM (Telecom Lifecycle Manager) SaaS platform and integrated with BLITZ™, an API that enables end-to-end procurement with carrier systems. This provides a single entry point for fulfillment and enables you to issue requests in real time. It also allows you to manage an entire fleet of wireless devices, carrier services, contracts and monthly spend in a single system, as well as access analytics and real-time reporting that can improve business outcomes.

WHY SMARTSIM-ENABLED HARDWARE DEVICES?

You get...

Lower Connectivity Costs
Competitive, pre-negotiated carrier pricing reduces total spend.

Improved Coverage
SmartSIM intelligently connects to the best-performing wireless network on each data session and enhances network redundancy with automatic failover.

Superior Security
SmartSIM provides deep packet inspection at the network layer to apply virus, malware and content filtering.

Seamless Ordering and Billing
No need to shop for price, mess with account setup, or manage multiple contracts and invoices.

Robust Reporting/Analytics
Business intelligence in real-time with SharpLink's management platform.

Managed Services
Add-on services are available to manage and optimize lines and activations, track zero-usage devices and deliver cost allocation reporting.

FAQ

WHAT ARE THE AVAILABLE DATA RATE PLANS?
Standard plans include 500MB, 1GB, 2GB, 5GB, 10GB, 20GB and custom unlimited IoT data plans.

CAN YOU POOL DATA PLANS?
Yes, each device requires a plan. Like plans can be pooled with each other to offer a "buffer" to overages on the overall account.

IS A TERM CONTRACT REQUIRED OR CREDIT CHECK?
We currently have 24 month, 36 month and 60 month terms available. No credit check required.

ARE THERE ACTIVATION FEES?
Yes. There is a one-time activation fee of $25.

IS THIS FOR DATA ONLY?
Yes, the SmartSIM solution is for data only applications. If voice/text is required, SharpLink has other options.

IS THERE SUPPORT?
Yes. SharpLink has experts on staff to support you and make sure you are getting the most out of the solution.
